

Press Release

WorkflowGen supports AJAX enriched .Net Web Forms.

Montreal, Canada - (November 29, 2006): ADVANTYS is a leading ISV offering the WorkflowGen BPM / Workflow software. WorkflowGen is used worldwide by organizations of all sizes to quickly and easily automate their business processes.

It is now possible to use the AJAX (Asynchronous JavaScript and XML) technology with Microsoft ATLAS within the .Net Web Forms designed for WorkflowGen's workflows.

The support of AJAX enables the organizations who are automating their processes with WorkflowGen to provide their users with an enriched more effective experience.

The AJAX technology enables the design of more interactive, fast and usable Web Forms by avoiding the reload of the form each time the users make a change.

The designers of Web Forms for WorkflowGen use either Visual Studio 2005 or Visual Web Developer Express 2005. The integration of the AJAX technology is made very simple by using Microsoft ATLAS.

About ADVANTYS

The WorkflowGen BPM / Workflow software is edited by ADVANTYS. Since 1995 ADVANTYS specializes in the implementation of high added-value solutions in the field of B2B web solutions. Over the last 10 years ADVANTYS has developed a suite of robust and innovative solutions used daily by hundreds of organizations worldwide.

The WorkflowGen BPM / Workflow software is fully web based and enables the end users to complete and monitor processes online. .Net Web Forms and PDF forms can be used as electronic forms. The design and implementation of the workflows are realized online via a graphical mapping interface without programming. The WorkflowGen BPM / Workflow software is based around a practical technical solution integrating tried and tested development standards. WorkflowGen's scalable architecture, and its ability to incorporate additional development, provides for easy integration with existing databases and applications including Microsoft Sharepoint and SAP. WorkflowGen is available in 10 languages and distributed in 30 countries
