

Press Release

ADVANTYS releases version 5.1 of the WorkflowGen BPM / Workflow software

Montreal, Canada - (October 21, 2008): ADVANTYS is a leading ISV offering the WorkflowGen BPM / Workflow software. WorkflowGen is used worldwide by organizations of all sizes to quickly and easily design, deploy, execute, monitor and analyze their automated business processes.

“Among several new features and improvements the new release of WorkflowGen offers a Web Service API. It is possible to access requests and actions data and statuses from 3rd party applications via web services in real time. The contents of the WorkflowGen portal are available as RSS feeds. Users are able to syndicate/register these feeds in any Web Portal solution or any RSS compliant tool like Outlook 2007 as well as widgets.” says Alain Bezancon President of ADVANTYS. “WorkflowGen 5.1 brings strengthened features for large scale enterprise usages and a standard based powerful environment for seamless integration with the end users most common interfaces.”

For 1 or 1000 processes to automate and 10 to 100 000+ users to manage, the WorkflowGen BPM / Workflow software offers a flexible yet powerful environment to implement both simple and very complex workflows involving human and system based actions.

The WorkflowGen BPM / Workflow software is fully web based and enables the end users to complete and monitor processes online. AJAX compliant .Net Web Forms forms are used as electronic forms. The design and implementation of the workflows are realized via a web browser with a graphical mapping interface without programming.

The WorkflowGen BPM / Workflow software is based around a practical technical solution integrating tried and tested development standards. WorkflowGen's scalable architecture, and its ability to incorporate additional developments, provide for easy integration with existing databases and applications including Microsoft Sharepoint and SAP.

About ADVANTYS

The WorkflowGen BPM / Workflow software is edited by ADVANTYS. Since 1995 ADVANTYS specializes in the implementation of high added-value solutions in the field of B2B web solutions. Over the past decade ADVANTYS has developed a suite of robust and innovative solutions used daily by hundreds of organizations worldwide.
