

Press Release

ADVANTYS releases version 4.2 of the WorkflowGen workflow software

Montreal, Canada - (July 25, 2005): ADVANTYS is a leading ISV offering the Smart Enterprise Suite (SES). WorkflowGen is the workflow software of the SES that is used by SME as well as global companies to quickly and simply streamline their operations.

“This new version of WorkflowGen offers many powerful new features that are the result of the constant feedback that we receive from our clients and partners worldwide.” says Alain Bezancon President of ADVANTYS. “Three years after its initial release, WorkflowGen has now reached a level of maturity that position it as a market leader. WorkflowGen provides the answer to the needs of organizations looking for an out-of-the-box solution that will enable them to quickly solve a business case by leveraging existing human and technical resources.”

The WorkflowGen workflow software is fully web based and enables the end users to complete and monitor processes online. Adobe Acrobat PDF and .Net Web forms can be used as electronic forms. The design and implementation of the workflows are realized online via a graphical mapping interface without programming.

The workflow software is based around a practical technical solution integrating tried and tested development standards (XML, ASP, .NET). WorkflowGen's scalable architecture, and its ability to incorporate additional development, provides for easy integration with existing databases and applications.

WorkflowGen is available in 10 languages and distributed in 30 countries.

About ADVANTYS

Established in 1995, ADVANTYS is a leading ISV offering the Smart Enterprise Suite (SES). The SES provides a modular yet fully integrated set of solutions. Within a single environment organizations of all sizes benefit from a coherent access to features encompassing content management, collaborative work, workflow and development components. ADVANTYS' practical approach to technology benefits its broad base of customers worldwide through a range of reliable, scalable, affordable and easy-to-use products.

SES full-web environment uses industry-proven technologies allowing SME, as well as major companies from all sectors, to quickly and easily build their web information systems. As an active member of international organizations like Workflow Management Coalition or OASIS group, ADVANTYS demonstrates its technological leadership and its ability to quickly and practically integrate standards as soon as they become mature and users-beneficial. This leadership brought Gartner to list ADVANTYS in the Smart Enterprise Suite Magic Quadrant 2004.
