

Press Release

ADVANTYS releases WorkflowGen Mobile for iPhone and iPod Touch.

Montreal, Canada - (August 9, 2010) ADVANTYS is a leading ISV offering the WorkflowGen BPM / Workflow software. WorkflowGen is used worldwide by organizations of all sizes to quickly and easily design, deploy, execute, monitor and analyze their automated business processes.

This first version of WorkflowGen Mobile for iPhone and iPod Touch is available for free to all the WorkflowGen customers. "We are very excited to offer this new possibility to our customers" declares Alain Bezançon, President of ADVANTYS. "WorkflowGen Mobile enables the users who have already implemented the WorkflowGen workflow software on their corporate web servers to access the WorkflowGen portal and perform their workflow actions remotely via their iPhone and iPod Touch devices."

WorkflowGen Mobile allows the users to stay in touch with their enterprise processes wherever they are by using the following features:

- display the list of processes
- launch a new process
- display the actions to do
- assign an action to another person
- perform searches
- complete web forms
- track the processes
- display the audit trail of the processes
- view processes attachments
- display and add comments to a process
- display late processes and actions indicators

For 1 or 1000 processes to automate and 10 to 100 000+ users to manage, the WorkflowGen BPM / Workflow software offers a flexible yet powerful environment to implement both simple and very complex workflows involving human and system based actions.

The WorkflowGen BPM / Workflow software is fully web based and enables the end users to complete and monitor processes online. .Net Web Forms forms are used as electronic forms. The design and implementation of the workflows are realized via a web browser with a graphical mapping interface without programming.

The WorkflowGen BPM / Workflow software is based around a practical technical solution integrating tried and tested development standards. WorkflowGen's scalable architecture, and its ability to incorporate additional developments, provide for easy integration with existing databases and applications including Microsoft Sharepoint and SAP.

About ADVANTYS

The WorkflowGen BPM / Workflow software is edited by ADVANTYS. Since 1995 ADVANTYS specializes in the implementation of high added-value solutions in the field of B2B web solutions. Over the past decade ADVANTYS has developed a suite of robust and innovative solutions used daily by hundreds of organizations worldwide.
