

Press Release

ADVANTYS Releases The Free WorkflowGen BPM Software App For iPad.

Montreal, Canada - (December 15, 2011) ADVANTYS is a leading ISV offering the WorkflowGen BPM software. WorkflowGen is an Enterprise Process Management Software released in 2003, it is used by 500 clients in 70 countries and 1,000,000 end-users worldwide. Organizations of all sizes use WorkflowGen to quickly and easily design, deploy, execute, monitor and analyze their automated business processes.

The WorkflowGen app for iPad enables the users who have already implemented the WorkflowGen BPM software on their corporate web servers to access the WorkflowGen portal and perform their workflow actions remotely via their iPad.

This app is available for FREE to all the WorkflowGen users.

The WorkflowGen app for iPad allows the users to stay in touch with their enterprise processes wherever they are by using the following features:

- display the list of processes
- launch a new process
- display the actions to do
- assign an action to another person
- perform searches
- complete web forms
- track the processes
- display the audit trail of the processes
- view processes attachments
- display and add comments to a process
- display late processes and actions indicators

About WorkflowGen

For 1 or 1000 processes to automate and 10 to 100 000+ users to manage, the WorkflowGen BPM software offers a flexible yet powerful environment to implement both simple and very complex workflows involving human and system based actions.

The WorkflowGen BPM software is fully web based and enables the end users to complete and monitor processes online. .Net Web Forms forms are used as electronic forms. The design and implementation of the workflows are realized via a web browser with a graphical mapping interface without programming.

The WorkflowGen BPM software is based around a practical technical solution integrating tried and tested development standards. WorkflowGen's scalable architecture, and its ability to incorporate additional developments, provide for easy integration with existing databases and applications including Microsoft Sharepoint and SAP.

About ADVANTYS

The WorkflowGen BPM software is edited by ADVANTYS. Founded in 1995 by the current management team, ADVANTYS specializes in the creation of information systems designed to simplify complex business communication exchanges. ADVANTYS' products are deployed by thousands of customers worldwide to automate processes, publish web sites, collaborate and develop web applications.
